

Multimedia Software- PowerPoint

Microsoft PowerPoint is a multimedia presentation software that allows you to combine text, images, audio, video, animations, and interactive elements into structured slideshows. It is widely used in education, business, and professional settings to deliver engaging content.

What is PowerPoint?

Microsoft PowerPoint is a multimedia presentation software that allows you to combine text, images, audio, video, animations, and interactive elements into slideshows.

What is PowerPoint used for?

PowerPoint is used to create multimedia presentations with text, images, audio, video, and animations.

What is the Ribbon in PowerPoint?

The Ribbon is the strip at the top of the window that organizes commands into tabs and groups.

What is an Animation in PowerPoint?

Animation is the effect applied to objects (text, images, charts) to make them move or highlight.

What is a Transition in PowerPoint?

Transition is the effect applied between slides to control how one slide changes to the next.

Which tab contains the New Slide option?

The **Home Tab** contains the New Slide option in the Slides group.

What is the shortcut key to insert a new slide?

Ctrl + M inserts a new slide quickly.

What is the difference between Animation and Transition?

Animation applies to objects on a slide, while Transition applies to the entire slide change.

The steps to insert a new slide in a PowerPoint presentation:

→Using the Ribbon

1. Go to the **Home Tab** on the Ribbon.
2. In the **Slides Group**, click **New Slide**.
3. The new slide will appear after the currently selected slide.

→Shortcut Method

- Press **Ctrl + M** on your keyboard.
